

## **SET UP INSTRUCTIONS**

### **3751 – 29” LAZIO JAR FOUNTAIN**

Open the bag containing the pump kit **P40011**. In the kit you will find:

1 - 40400 (400 gallon per hour pump)	1 – LED light kit (white)	1 - tube of silicone
1 – 3/4" clear tubing 2 1/2" long	1 – 1/2" male adapter (MIPT X SOC)	
1 – 1/2" PVC pipe 14 3/4" long	1 – 2-hole rubber stopper	

1. Place the Lazio jar on a firm and level surface where the fountain will remain. Find the pump, the LED light and the 2-hole rubber stopper. Slip the 2-hole rubber stopper onto the power cord of the pump and the power cord of the LED light with the smaller end facing away from the pump and the LED light. Position the 2-hole rubber stopper about 8" from the body of the pump and about 36" from the LED light. Remove the 1/2" barbed connection from the LED light head and attach the 3/4" barbed connection onto the LED light head.

2. Run the plug end on the power cord of the pump and the plug end on LED lights down the PVC insert located in the center of the Lazio jar and out the bottom of the Lazio jar. Retrieve the power cords from under the Lazio jar and place in the groove in the bottom of the Lazio jar.

Find the tube of silicone. For a watertight seal apply silicone around the top inside edge of the PVC insert and around the 2-hole rubber stopper. Insert the 2-hole rubber stoppers snugly into the PVC insert. Apply more silicone around the top of the 2-hole rubber stopper and the two wires. Drape the LED light head out and over the top opening in the Lazio jar.

3. Find the drain plug and insert snugly into the drain insert located on the floor inside the Lazio jar. Remove any tape and or dirt from the drain insert before you insert the drain plug.

Find the pump house and the pump house cover. Position the pump house centered on the floor inside the Lazio jar. Position the pump in the pump house with the flow control facing the opening in the pump house. The LED light power cord will run out the opening in the pump house.

4. Find the 1/2" male adaptor, the 1/2" PVC pipe and the 3/4" clear tubing 2 1/2" long. Attach the slip end of the 1/2" male adaptor onto the end of the 1/2" PVC pipe. Push the adaptor onto the PVC pipe until it bottoms out. On the opposite end of the 1/2" PVC pipe attach the 3/4" clear tubing 2 1/2" long. Slip the 3/4" clear tubing onto the end of 1/2" PVC pipe about half way. Screw the threaded end of the 1/2" male adapter into the outlet of the pump. CAREFULLY, place the pump house cover in the cavity of the jar feeding the 1/2" PVC pipe up through the hole in the center of the pump house cover. Position the pump house cover on the top of the pump house. Position the 1/2" PVC pipe in the center of the jar cavity. Attach the Led light to the 3/4" clear tubing.

5. Add about 14" of tap water inside the cavity of the Lazio jar.

6. Connect the power cord for the LED light to the transformer. Plug both the pump and the LED light transformer into a 110VAC GFCI protected outlet.
